

Technicians for North America Courses

Technicians for North America is sponsored by Caterpillar, the global leader in construction and mining equipment. Caterpillar has created this curriculum using courses from the Caterpillar University Global Service Technician training program. So you know it's good!

The curriculum consists of 18 courses: four Introductory courses, ten Level 1 courses and four Level 2 courses. Completion time is estimated to take approximately 3-6 months. (Yes. That's right. It's comprehensive. This is the real deal and you will need to work hard but the results could well be worth the effort.)

All the courses are virtual (computer-based). You can take the courses everywhere you have a decent Internet connection, using your personal computer, laptop, or mobile phone.

Caterpillar Introduction

#	Course	Duration (Hours)	Languages
1	The Caterpillar Story	1:30	English
2	The Cat® Dealer Organization	1:00	English
3	Cat Engines Product Line & Applications	1:00	English
